

Career Profile

Refined **Occupational Safety & Loss Prevention Practitioner** with 20+ years of experience developing and applying efficient safety and loss prevention resources as well as strategies for drilling, completion, facility construction and production activities. Improve business efficiency and profitability through implementation of effective loss prevention, leadership, and compliance strategies. Seek to maintain professional respect and core business value alignment between all operational stakeholders which is essential for integration and sustainability of effective management systems.

- ▣ Safety Management
- ▣ Project Management
- ▣ Critical Analysis & Resolution
- ▣ Loss Prevention
- ▣ Safety Training & Development
- ▣ Audits & Investigation
- ▣ Root Cause Analysis & SCAT
- ▣ Operational Efficiency/Profitability
- ▣ Mitigating Risks
- ▣ Regulatory & Safety Compliance
- ▣ Metrics & Reporting
- ▣ Measurement Indicators

Selected Accomplishments

- ▣ Key player in assisting Husky Gas Resource Development Drilling , Completions & LPG Fracturing to successfully reduce TRIF impact from 2.10 (2009) to 1.53 (2010) to 0.89 (2011) and 0.00 (2015).
- ▣ Completed both 2008 & 2010 Winter Logistics / Construction activities with 0.00 TRIF with MEG Energy Corporation.
- ▣ Part of the team that assisted in reducing Land based Drilling (Winter Projects) recordable injury events from 36 (2003) to 11 (2004) to 1 (2009) with Cenovus Energy.
- ▣ Invited to be a Guest Speaker on two occasions at CAPP in regards to Safety Management plan for winter drilling and delineation program while working for MEG Energy.
- ▣ Developed "Path Forward" systems and project improvement plan for 2009 Winter Drilling Program.

Professional Development

SUPERVISORY & MANAGEMENT TRAINING / CERTIFICATES

- ▣ Safety Leadership and Behavior Training
- ▣ Priority Time Management Training
- ▣ Dale Carnegie Effective Speaking
- ▣ Second Line Supervisors Well Control (Enform)
- ▣ Safety Leadership and Behaviour Training
- ▣ Incident Investigation & Root Cause Analysis (Tap Root & DNV)
- ▣ Safety Management & Regulatory Awareness for Well-site Supervision
- ▣ Health & Safety Program Development
- ▣ Rigging & Lifting Train the Trainer
- ▣ Train the Trainer (H2S Alive)
- ▣ Health & Safety UPITFOS Auditor
- ▣ Modern Safety Management (DNV)
- ▣ External Safety Auditor Training
- ▣ Practical Loss Control (DNV)

SAFETY, TECHNICAL & INDUSTRY SPECIFIC TRAINING

- ▣ Well Service Blow Out Prevention
- ▣ Coil Tubing Blow Out Prevention
- ▣ Standard First Aid & CPR (Level C)
- ▣ Advanced Well Control (Prentice & Hill)
- ▣ LPG Fracing Fundamentals / Flow-Back Training
- ▣ Ground Disturbance Level 2
- ▣ Hydrocarbon Gas Detection and Monitoring
- ▣ National Safety Group Construction Safety Passport (UK)
- ▣ STOP Behaviour Based Safety Training
- ▣ Fall Arrest & Protection
- ▣ High Angle Rig Rescue
- ▣ WHMIS
- ▣ H2S Alive
- ▣ Transportation of Dangerous Goods
- ▣ Confined Space Entry / Rescue
- ▣ Safety & Compliance Inspections
- ▣ Wilderness / Bear Awareness
- ▣ ETracker – J.W. Toups

Key Areas of Expertise

SAFETY MANAGEMENT / ORIENTATION

- ▣ Maintain world class Total Recordable Incident Frequency rates consistently coming in well below industry standards and often setting records (TRIF free year multiple times).
- ▣ Determine and develop safety strategies and applications of methods to assist clients to improve their occupational safety record focussed on exceeding their objectives.
- ▣ Safety liaison maintaining ongoing communication with regulatory bodies (OHS-AER, etc.).
- ▣ Instrumental to the implementation of effective HSE management system and initiatives by front line management.
- ▣ Provide support to contracted activities in the area of applied safety management systems.

OPERATIONAL OVERVIEW

- ▣ Business minded professional fostering and pragmatic approach to operational activities while applying loss prevention strategies with profitability.
- ▣ Background in project management applying safety and loss strategy as well as the budget that supported the plan ensuring to stay aligned with projections.
- ▣ Resource and manage team of Field Safety/Loss Prevention Advisors in order to support winter coring/completion project/construction and logistics.
- ▣ Coordinate activities for international safety coordinators and managers while collaborating with local safety supervisors to meet regulatory requirements.
- ▣ Extensive experience in coordinating field activities through allocating safety resources, materials, and tools to complete project work in the most cost effective and efficient manner.
- ▣ Handle financial controls with experience in developing and managing budgetary considerations for operational management personnel and safety groups.
- ▣ Ensure effective and optimized daily performance, void of preventable incidence and loss prevention which are integral to core management daily planning and task execution.

STAFF MANAGEMENT / TRAINING / LEADERSHIP

- ▣ Staff management experience with experience to oversee and support Drilling & Completion Safety Advisors, Production Safety Advisors, Earthworks Safety Advisors, and Processing/Facility Construction Safety Advisors.
- ▣ Direct and support Health and Safety Coordinators in integrated Oil and Gas Operations (Drilling/Completions, Production, Facility Construction, Camps, and Seismic).
- ▣ Manage and coordinate department activities including training and mentoring management and employees to conform to company and operational objectives.
- ▣ Able to assist Engineering and Operational staff in all operational related Risk Assessment, MOC, RCA.

SCOPE OF INFLUENCE / INTERPERSONAL RELATIONS

- ▣ Work In conjunction with Operations Management teams to develop and implement an internal HSE management system.
- ▣ Expert human relation and interpersonal skills with the ability to recognize, read, and influence personnel while focussing on utilizing each to their full potential while continually driving personal development.
- ▣ Gain respect and build rapport with clients through working collaboratively to meet requirements.
- ▣ Interact with all levels of personnel, from contractor's workers to their senior management, as well as all levels of the clients/employers and staff.
- ▣ Experience in providing advice and support in Field Operations Management in the application of risk assessment, safety management strategies, practices, and standards.
- ▣ Increase local workforce employee safety awareness through effectively communicating the essence of the applied Safety Management System.

Key Areas of Expertise

PROGRAM DEVELOPMENT / DOCUMENTATION

- ▣ Developed and implemented the Pro-ACT Hazardous Condition & Near Miss reporting program.
- ▣ Implement and facilitate safety programs such as DuPont STOP program, a behaviour based safety program.
- ▣ Develop and maintain safety performance programs for multiple service rigs; safety inspections and auditing, injury claims and environmental management, incident investigations, hazard analysis, and safe work procedures.
- ▣ Able to assist in improving Contractor Safety Performance through the measurement of the application of their internal safety management systems.
- ▣ Develop and implement, restricted and modify duty and injury claims management program.

INTEGRITY OF OPERATIONS / COMPLIANCE / REPORTING

- ▣ Extensive experience in the area of Loss Prevention with proficiency using the TapRoot and SCAT investigation training and application procedures.
- ▣ Support and refine existing internal loss prevention and risk assessment processes.
- ▣ Through the collaborative efforts of management and vendors, successfully increase the reporting of actual and potential incidents occurring on worksites using this information to examine latent conditions and develop supportive risk mitigation plans.
- ▣ Ensure HSE compliance with internal and regulatory safety and environmental standards.
- ▣ Present HSE statistical reports and data to management to keep them up to date with projects and details.
- ▣ Very skilled, thorough and experienced incident investigation procedures and reporting protocols.

Career History

PROJECT LEAD – Field Ops

2012-Present

Cenovus Energy (Edson- Gas Resource Development)

- ▣ *Advise and support the Safety & Loss Prevention team and Ansell Operational Management Team in regards to applied Operational Compliance and Loss Prevention.*

LEAD LOSS PREVENTION MANAGER

2008-2012

EL TD Core, Pakistan

- ▣ *Designed and implemented discipline specific loss prevention standards and protocols for Winter Drilling, SAGD Commercial, Drilling, Construction and Logistic programs.*

LEAD HEALTH AND SAFETY AREA MANAGER

2003-2008

Cenovus Energy (Formerly ENCANA CORP) — Integrated Oil Division, Cold Lake, AB

- ▣ *Managed health and safety coordination within the scope of SAGD Production, Drilling, Construction and support activities at the Foster Creek Production site overseeing CMT and FCT operations.*

CORPORATE HSE OFFICER

2001-2003

Simmons Resources Group - International Rotational/Consulting, Calgary, AB

- ▣ *Drilling and well servicing operations (conventional / geothermal / gas storage caverns) within UK, Indonesia, Papua New Guinea, Albania, El Salvador, and Oman.*

HSE MANAGER / CONSULTANT

1999-2000

IISP INC (Karazhanbas (KBM) Munia Field) — Kazakhstan International Rotational, Los Angeles, CA

- ▣ *Provided Health, Safety, and Environmental management and consulting services within civil construction, drilling, well-servicing, fabrication, and production facility within Kazakhstan.*

SENIOR HSE MANAGER

2000-2002

Precision Drilling International - Calgary, AB

- ▣ *Developed and managed HSE Management System for international land based drilling operations at international sites including Venezuela, Mexico, and Kazakhstan.*
